

TwinTech **Ultimate** MEDICAL RANGE

Solus

Twintech Ultimate "Solus"

Castors for Institutional applications

Standard Fixing: Threaded stem

Functions: Free Swivel, Total Lock, Directional Lock

Standard colour: RAL 9003 white with Grey tyres, top cap and brake pedal (as shown).

Applications: Daycare beds, nursing home beds, Laser surgery equipment, Ultrasound units, Patient hoists, all medical equipment requiring a "designer" castor.

Options: Electrically conductive and washable versions; alternative fixings; custom colour wheel covers; SUPPRESS antimicrobial treatment - consult factory.

Conforms to: ISO 22881: 2004

Combi

Twintech Ultimate "Combi"

Castors for hospital beds and complex medical equipment

Standard Stems: 28x98mm, 32x52mm Central Locking

Functions: Free Swivel, Total Lock, Total and Directional Lock. 45 degree cam movement

Standard colour: RAL 9003 white with Grey tyres, top cap (as shown).

Applications: Hospital beds, care beds, anaesthesia machines, imaging equipment, laser surgery equipment, all equipment requiring a centrally-operated braking system in a "designer" castor.

Options: Electrically conductive and washable versions; 25x32mm Central Locking Stem – total lock only; 30 deg cams; custom colour wheel covers; SUPPRESS Antimicrobial treatment - consult factory

Conforms to: ISO 22882:2004

Central Locking System Castors

When all the castors in a set need to be locked simultaneously, TwinTech **Ultimate** Combi castors provide the solution.

Brake Functions:

Total Lock – The brake simultaneously locks wheel rotation and swivelling action. Four castors will completely immobilise the equipment.

Total & Directional Lock – These castors have two brake positions: total lock and swivel lock only. Use of one or two of these castors in a set enables the equipment to be moved easily in a straight line and steered around corners in a controlled fashion, when 'Directional Lock' is selected.

Free Swivel – no braking action.

Some typical layouts are shown opposite. When Total & Directional Lock castors are used, it is important to specify the correct Mode, which denotes the position of the brake actuating bar, relative to the direction of travel, when the Directional Lock brake function is selected. The typical castor layouts shown demonstrate Directional Lock Modes 03 and 04.

Ultimate

Colson Castors pioneered the 'Designer' castor for medical applications with the award-winning TwinTech range. Now this concept has been taken to a new level, with innovative design and materials selection achieving even greater performance, durability and value.

TwinTech **Ultimate** Castors

Engineered for medical applications, these castors meet the criteria of exceptional reliability, strength, durability and designer looks.

- **Strength:** Die-cast aluminium central body
- **Highly Manoeuvrable:** Ball bearing swivel head and sealed precision bearing wheels
- **Durability and lightness:** Wheels moulded in Nylon 6
- **Smooth, quiet ride:** Hard-wearing polyurethane tyres
- **Hygienic:** All castors can be supplied with SUPPRESS Antimicrobial treatment
- **High quality finish:** RAL 9003 white with grey polyurethane tyres

Solus Castors

Specially engineered for Institutional Applications these are available as free swivel or with total lock or directional lock brakes.

Combi Central-Locking Castors

Recommended for hospital beds and medical equipment, these castors have been designed to offer greater flexibility and improved manoeuvrability.

- **Maintenance-free** braking: no adjustments required.
- **Secure:** Swivel lock and wheel brakes operate independently, improving performance
- **Dynamic braking:** Operating the brake whilst in motion does not damage the mechanism
- **Built-in reliability:** new design has improved performance yet reduced the number of components

SUPPRESS Antimicrobial Treatment

All TwinTech **Ultimate** castor wheels can be treated with SUPPRESS Antimicrobial Compound, which significantly inhibits growth of bacteria, in particular, strains of MRSA, E.coli and C. Diff. This inorganic active ingredient remains within the polymer and is released continuously to the surface of the wheel. An effective way to preserve the life of the wheel, as it is unaffected by chips, scratches and abrasions.

More medical castors from Colson:

TravelAid: Durable 115 and 125mm plastic castors with easy to use push-button brake for all types of ward equipment and furniture.
Load rating: 60kg

MediMaster: Highly-maneuvrable 100mm plastic castors with convenient through-bolt fixing. Ideal for patient lifting and transport applications.
Load rating: 100kg

PlasTech: Versatile 100 and 125mm plastic castors with threaded stem and plate fixings for ward furniture, computer stands, mobile equipment.
Load rating: 80 to 100kg

SingleTech: A range of single wheel designer castors for Medical applications. 100 and 125mm Solus versions with threaded stems and 125 and 150mm Combi castors for central locking applications.
Load rating: 90 up to 150kg

Style: Rugged 125mm swivel and total lock steel castors, under an hygienic and attractive plastic cover, giving style to strength.
Load rating: 100 - 200kg
